## FEATURES

## - Compact (half-size).

The base area is approximately half the size of conventional (JS-M) relays. The controller unit can be made more compact.
Base area has been reduced by one half

- Perfect for automobile electrical systems.
Over $2 \times 10^{5}$ openings possible with a 14 V DC motor load, an inrush current of 25 A, and steady state current of 5 A .
(N.O. side)
- Standard terminal pitch employed The terminal array used is identical to that used in small automotive relays.
- Plastic sealed type.

Plastically sealed for automatic cleaning.

- Line-up of 1 Form A and 1 Form C.

## TYPICAL APPLICATIONS

- Power windows
- Auto door lock
- Electrically powered sun roof
- Electrically powered mirror
- Cornerring lamp, etc.
